SCI – THE BASICS

SCI understands that changing the face of education presents plenty of challenges and like many schools, have discovered that technology alone cannot boost test scores or guarantee future Einsteins.

At System Concepts we integrate today's technologies in a way that allows your teachers to acquire the skills necessary to prepare our students for life and work in today's media driven world. In the "Ideal 21st Century Classroom, your learning skills, your knowledge of the core content, and your technology skills must all intersect to reinforce each other assuring that our teachers and our children attain learning skills through the use of technology.

SCI PROFESSIONAL DEVELOPMENT

An effective training program is critical to turn cynical teachers into inspired enthusiasts. Couple this with a fixed installation in classrooms, which frees your teachers from logistical problems so that they are free to teach and you are well on your way to developing your 21st Century Classroom.

SCI delivers training that ensures your teachers become more effective communicators using technology, so the tools they use become just another resource to help our students explore their ideas.

SCI FUNDING

It's easier than you think. Under the No Child Left Behind Act (NCLB) every education program is a technology opportunity. SCI has the strategies for identifying federal funding to procure 21st Century tools for your school or district. Your Ideal Classroom can be purchased through a variety of funding options including but not limited to: Capital, Technology, Professional Development, NCLB Title Funds, Grants, and more.

SCI is your Promethean certified reseller for IL, MN, WI, ND and SD. SCI provides interactive technology solutions that revolutionize and inspire learning for today's media driven students.

We enrich teaching and unlock learning.
