Document Camera

Cam-210 Hi Resolution Document Camera

Price*

\$948.70

Exceptional Image Quality
High Resolution, XGA 1024 x 768
Digital zoom, 15x
Fluorescent lamp
Image flip up/down selectable
Extremely easy to use

The Dukane Camera 210 is a digital visualizer designed for ease of use. It is a true plug and play device that leaves no room for human error. The camera is equipped with a high performance CCD that provides superior image quality. The 1024 x 768 XGA resolution assures you of vivid images. The lens is designed for high field depth performance that ensures razor sharp images of 3D objects. The convenient pass through function allows simple signal source selection from either the visualizer itself or from your computer without interrupting your presentation. The Camera 210 is an extremely functional stylish visualizer, that goes well into any boardroom. Use it to capture, save and display scenes in industry, boardroom or the classroom. Look at graphics, laboratory experiments, test results, groups individual images or any other objects with this stylish visualizer. The Camera 210 is the ideal partner to the Dukane ImagePro projectors and provides the means to display the hidden world. The Camera 210 has a smart gooseneck design that simplifies complicated mechanical visor adjustments. The lens head and the light head may be rotated 360 degrees, allowing images to be captured at all angles. In addition, the lamp is built on an adjustable swivel that can be rotated to avoid glare and shadow effects caused by external illuminants.

Visualizer

DVP303A Visualizer

Price*

\$1,988.70

High Resolution XGA Images
 Computer Output
 Auto Focus Camera
 16 Picture Memory
 Easy to Transport
 10X Optical and 4X Digital Zoom

The DVP303A is a digital presenter consisting of a high-resolution color camera on a moveable extendable arm mounted over a stage with a backlight. There are also lights on arms located on each side of the stage for illumination of the subject. The presenter camera output images can be directed to a projector or computer monitor for display. To provide versatile operation there are connections for a computer input, USB, and remote control RS-232. The color camera has a 1024 x 768, XGA resolution which provides an exceptional image in either XGA or SVGA resolution. The image output is via a standard computer VGA style cable. This presenter is very easy to use and can be controlled by the built-in controls or via a credit card size remote control that is stored in the presenter's base. It merely requires plugging into standard power, connection of the computer cable to the projector or display monitor, and the push of the power button. After that the user can position the camera arm and push the auto focus button. Additional image options exist for the creative presenter but the first time user can easily take command. The XGA images that the camera displays are 4 times the resolution of a normal TV image. Consequently this image must be shown on a computer monitor, data/video projector or plasma panel. It results in clarity not possible until now.

The DVP303A has a 10X optical and 4x digital zoom range controlled by buttons. The camera which has auto focus can easily view objects at 80X magnification. Up to 16 images can be captured by merely pushing the Capture button on the remote. A montage of these images can be instantly previewed and on image selected for full screen display. The images can be transferred to a PC by the USB connection for further storage or processing. A PS/2 mouse connection permits mouse control of the menu or movement of an electronic pointer over the image. Objects such as transparencies can be illuminated from the backside using the stage lamp or illuminated from above by the side fluorescent lamps. A "source" button permits switching between the presenter camera and an external computer input. Thus this unit can be placed in a system with a single VGA cable to the projector. Remote control is possible by the RS-232 input. Other features include gamma "photo/text" mode, image freeze, automatic white balance, brightness control, 3 language menu, image flip and lamp control. The presenter is the perfect tool for providing images of objects, evidence, paper, X-rays, or demonstrations in the classroom, conference room courtroom at the podium or video conferencing.

Overhead Projector

Sun Splash 2100 Series

Price*

Ultra rugged and super high performance, Dukane Sunsplash units offer high value and low cost. By offering 21 different configurations Dukane Sunsplash overhead projectors match up to any specification. All Dukane Sunsplash projectors use the highest quality all-glass optics and an easy to use rack and pinion focusing mechanism. This assures you of razor sharp image reproduction from edge to edge, dramatically reducing audience eye strain. Dukane Sunsplash 3000 and 4000 lumen units feature a High/Low switch to extend lamp life- up to 250 hours on 3100 series units. And of course all Sunsplash units are protected by Dukane's Five Year Limited Warranty.

Overhead Projector

Starfire Series

Price*

Ultra compact and super high performance, Dukane Starfire units represent a new concept in transportable overhead projectors. By using a patented low profile folding design, Starfire overhead projectors deliver outstanding performance without the bulk and size of a traditional unit, and at a remarkably low price. The units feature a unique 180 degree rotating head for maximum placement flexibility. All Starfire projectors use the highest quality all-glass optics in a triplet configuration. This assures you of razor sharp image reproduction from edge to edge, dramatically reducing audience eye strain.

Key Features

- 3000-6000 lumen brightness
- ABS Base
- 180 degree rotating head
- Soft start electronic power supply
- Quiet high efficiency fan
- Low profile patented foldaway design
- Rugged ABS construction and heat tolerant stage
- Rack and Pinion focus
- Easily accessible power supply

Plasma Screen

Image Pro P50HC2

Price*

\$7,148.70

The P50HC2 is a flat plasma display panel of 50-inch diagonal area. It is extremely easy to use and provides brilliant sharp color images. It has a brightness and picture similar to a conventional CRT monitor, but a depth of less than 4 inches. Due to its thin size and relatively lightweight, it can be wall mounted, put on a table stand, or held by an arm. This self-contained flat display is a computer monitor or high definition TV. The P50HC2 is a special panel with a high resolution of 1366 (horizontal) by 768 (vertical) pixels in an aspect ratio of 16:9.. This is the correct aspect ratio for HDTV and many movie formats. The image can be viewed from the side with the brightness remaining constant.

Key Features

- 50 Inch Display
- 1366 X 768 Resolution
- 3000:1 Contrast Ratio
- 16.7 Million Colors
- Viewing Angle of over 160 Degrees
- Only 3.7 Inches Deep
- Picture-In-Picture

Included in Price

- Remote control
- Batteries
- Power cord
- Cable clamps
- User's Manual

Optional (Call For Pricing)

- Table Stand – TS-C50P5G
- Angled Wall Mount– TS-C50P2G
- Mount for Suspended Ceilings – TS-C50P3G
- Straight Wall Mount – TS-C50P6G
- Side Mount Speakers – TS-C5001SPG

Wall Screen

These screens will easily fit your classroom or facility. They have a universally acceptable flat matte, white screen surface that distributes the light evenly over the largest viewing area. This results in low glare and provides vibrant, bright colors with no hue shift or distortion. The screens can be mounted directly to the wall with 2 screws. In addition an optional short six-inch bracket is available to position the screen out from the wall thereby providing clearance for a whiteboard. To angle the screen further from the wall for keystone correction, an adjustable 12 to 22 inch wall bracket is available.

Key Features

- Long Lasting Contemporary Styled Screen
- Simple to attach to the wall
- Black Side Borders to Frame Your Image
- Easy Pull stops – Pull Down or Retraction
- Bottom Metal Beam for Flat Screen Surface
- Flame Retardant Materials
- Perfect Matte White Screen for Exceptional Images
- Accessory Brackets for Installations to fit your room
- Available in Two Formats, Square and Wide-Format
